FOR IMMEDIATE RELEASE

**Eco Chemical™ TempLine™ Field Paint will be on the field at Lucas Oil Stadium for
The 2016 NFL Scouting Combine February 24 – February 29, 2016**

See TempLine™ paints in action at this year's event

INDIANAPOLIS, Ind., February 26, 2016 – Eco Chemical™ TempLine Turf Marking system is being used by the National Football League to paint the Lucas Oil Stadium field for the 2016 NFL Scouting Combine, held in Indianapolis, Indiana from February 24 – February 29, 2016.

The highly reliable TempLine™ paint application and removal system is well known and highly regarded among NFL field management professionals as a leading brand for responsible, sustainable, and high-quality field marking products.

Combine attendees have the opportunity to see TempLine paints in action on the field at Lucas Oil Stadium until Monday, February 29. On Friday, February 26, running backs, offensive linemen, and special teams will perform on-field workouts, and on Saturday, February 27, quarterbacks, wide receivers, and tight ends will take to the field. On-field workouts for defensive linemen and linebackers will occur on Sunday, February 28, and for defensive backs on Monday, February 29.

For more information, visit NFLCombine.net.

The TempLine™ System will be used to mark the field for all of the several NFL Draft events, and can be removed quickly and easily at the conclusion of the Combine. Come check out the results at the Combine this weekend, or learn more about our full range of products by emailing info@ecochemical.com.
