

TEMPLINE™ PRE-GAME

Helps Take the Shine Off Your New Field

We Understand Synthetic Turf.

Residue from the manufacturing process can coat the strands of new synthetic turf, making it challenging to paint for the first few times.

TempLine™ Pre-Game can help you overcome the challenge.

TempLine™ Pre-Game Conditioner: A New Solution to an Old Problem

TempLine™ Pre-Game enhances paint adhesion for initial painting by conditioning the surfaces of the turf strands to be painted.

- Allows for more thorough, even paint coverage
- Minimizes the labor required to get that first-time paint on the field
- Works with most leading brands of synthetic turf

Prepping the Field for Game Time

TempLine™ Pre-Game is a proprietary formulation that makes new synthetic turf more uniformly receptive to TempLine field paints while helping to ensure the paint stays on the field.

- Easily prepared and applied with any type of sprayer
- Works quickly, leaving your field ready to paint with normal drying time
- Formulated to work with TempLine Synthetic Turf Paints
- Won't impede paint removal when you're ready to take it off

The Only Effective Pre-Painting Preparation for New Fields

The TempLine™ brand is your assurance of optimum performance and economy in any synthetic field preparation, marking, and removal product.

- Reduce the stress of new field preparation and painting
- Achieve a durable, quality finished paint job your team can be proud of
- Keep the paint on the turf and off the players
- Save time and money by minimizing the repainting typically associated with new fields
- Get a reliable solution at a reasonable cost
